## **DETAILED ACTION**

## Election/Restrictions

- Restriction to one of the following inventions is required under 35 U.S.C.
   121:
  - I. Claims 31-53, drawn to scheduling, classified in class 705, subclass 5.
  - Claims 54-58, drawn to wireless devices, classified in class 455, subclass
     403.
- The inventions are distinct, each from the other because of the following reasons: Inventions I-II are related subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as hotel reservations. Invention II has separate utility such as wireless phones.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
